Profile

Senior Product Owner / Product Manager with 7+ years product ownership across Shopee and Kamereo, leading ecommerce and internal operation systems. Strong at translating ambiguous business and operational problems into PRDs/BRDs, workflows, user stories, acceptance criteria, backlog priorities, UAT, release plans, and post-launch improvements. Experienced across finance/payment workflows, warehouse fulfillment, master data/commercial controls, CRM governance, buyer app experience, integrations, and analytics. Managed Engineering team for 3 years and currently leads 3 Product Owners and 2 UI/UX Designers while still acting as Product Owner / Product Manager for critical initiatives.

Target Roles

Product Owner	Product Manager	Business Analyst
Solutions Consultant	Project Manager	Product Lead

Core Competencies

Requirements gathering & stakeholder workshops	PRD / BRD documentation	User stories & acceptance criteria
Business process analysis & workflow design	Backlog management & roadmap prioritisation	UAT planning & release readiness
Agile/Scrum delivery with engineering teams	Product discovery & user research	Data analytics & dashboard requirements
API/integration coordination	Access control & data governance	Remote/asynchronous documentation

Professional Experience

Product Manager / Product Lead - B2B Platform & Internal Systems | Kamereo | Apr 2022 - Present

Kamereo is a B2B purchasing platform for restaurants and businesses, with customer ordering web/app and multiple internal operation systems.

- Own product roadmap and execution across customer-facing B2B ecommerce and internal operation platforms covering finance, fulfillment, master data, CRM, HR, buyer experience, analytics, and integrations.
- Lead a product/design team of 3 Product Owners and 2 UI/UX Designers; previously also managed Engineering Team for 3 years.
- Translate business and operational needs into problem statements, PRDs/BRDs, workflow diagrams, user stories, acceptance criteria, release scope, UAT plans, launch checklists, and post-launch iteration plans.
- Facilitate prioritization across customer impact, operation/finance/control risk, data integrity, stakeholder urgency, and engineering effort.
- Coordinate delivery with Business, Operations, Warehouse, Finance, HR, Design, Engineering, Data, QA/QC, and external partners.
- Maintain a steady monthly release cadence while improving system reliability, operational visibility, internal workflow efficiency, and customer experience.

Selected product lines and systems

- **Cash-Safe Growth Engine:** Finance and cash-control workflows covering revenue/cash/debt dashboards, customer debt terms, invoice display, payment allocation, FAST invoice auto issuance, VAT logic by buyer type, and QR/payment allocation.
- **Execution Excellence Platform:** Warehouse execution workflows covering picker dispatch and monitoring, Picking/QC app improvement, QC floor and delivery-window grouping, picker/QC performance dashboards, delivery app concepts, Onwheel integration, and supply-chain forecast/PO creation.
- **Master Data & Commercial Control:** Product and commercial data foundations covering Master SKU/product relationships, SKU conversion tracking, supplier-to-SKU logic, replacement of spreadsheet-managed SKU information, special price, voucher, loyalty, sample/gift controls.
- **Sales Productivity & CRM Governance:** CRM governance and sales workflows covering team/member/role/region management, team-based CRM list control, customer information access, geo-fenced sales check-in/out, follow-up tasks, and short-term commercial forecast dashboards.
- **People Platform / HR System:** Internal people platform covering career site, application tracking, employee check-in, timesheet, time-off requests, notification/calendar coordination, and referral hiring workflows.
- **Buyer Experience & Growth Platform:** Buyer web/app experience improvements covering redesign, cart/checkout simplification, guest cart, simplified login, onboarding, welcome banners, trust pages, referral, F&B starter kit, and AI-assisted buyer concepts.
- **Data & Integration Foundations:** Metabase Auto Dashboard, OCB virtual bank account integration, FutureLog EDI integration, invoice/payment status visibility, and reporting foundations for internal decision-making.

Contribution-led outcomes

- Improved visibility and control across revenue, invoice, debt, cash-received, payment allocation, and reconciliation workflows.
- Reduced manual status checking and spreadsheet dependency by moving operational and commercial rules into system workflows.
- Standardized picking, QC, delivery, and warehouse monitoring workflows to improve operational visibility and execution discipline.
- Strengthened CRM/customer-data governance through team-based visibility and clearer sales ownership rules.
- Created clearer people-system workflows for hiring, attendance, timesheet, time-off, and referral processes.
- Improved buyer journey clarity across browsing, login, cart/checkout, onboarding, trust pages, and assisted buying concepts.

Product Owner - Partner Messaging Internal Tool | [Shopee](#) | Sep 2020 - Feb 2022

Owned an internal product using Zalo Official Account services so Shopee teams could communicate with partners, including sellers, affiliate partners/KOLs, publishers, and relationship-managed accounts.

- Defined product direction and roadmap, managed backlog, user stories, acceptance criteria, and release scope for internal users.
- Gathered requirements from business and operations teams, evaluated UX/UI, and coordinated Agile/Scrum delivery with Engineering, Design, BI, and external partner Zalo.
- Supported UAT, launch readiness, adoption feedback, defect tracking, and continuous improvement of partner communication workflows.
- Tracked product performance measures and translated internal user feedback into prioritized improvements.

Product Management - Payments & Digital Products | [Shopee](#) | Aug 2019 - Aug 2020

Worked across payment product lines including ShopeePay, cards, online banking, bank transfers, checkout vouchers/coins, digital products, e-vouchers, food, and flight tickets.

- Coordinated feature understanding, business requirements, and rollout readiness across regional and local product/business teams.
- Collected feedback, investigated product issues, and relayed improvement opportunities to Product Owners and regional teams.
- Coordinated UAT, release checklists, live testing, and launch readiness for payment and checkout-related features.
- Prepared BRDs, analyzed live bugs, and communicated potential fraud, operational, and customer-experience risks.

User Researcher | [Shopee](#) | Aug 2017 - Jul 2019

Research role supporting product and customer-experience decision-making.

- Ran qualitative interviews, usability tests, surveys, journey/pain-point analysis, competitor research, and consumer behavior studies.
- Translated customer insights into product recommendations and stakeholder communication for experience improvements.

Research Assistant | [Ipsos](#) | Aug 2016 - Jul 2017

- Supported ad-hoc studies and brand health tracking, including questionnaire design, field setup, and client/internal coordination.
